Figure 1: Pre-QC *PerctMT* Distribution for each subject

Figure 2: Post QC distribution of $PerctMT$ with thresholds implemented by Arazi, Rao, Berthier, et al
Figure 3: Post QC distribution of $PerctMT$ with thresholds implemented in this paper

Subject Number	1	2	3	4	5	6	7	8	9	
Number of Observations Before QC	375	375	364	381	340	383	383	356	372	
Number of Observations After QC	0	0	0	0	58	86	32	0	31	

Subject Number	10	11	12	13	14	15	16	17	18	19
Number of Observations Before QC	327	311	379	375	345	371	381	381	377	380
Number of Observations After QC	21	107	0	107	100	25	0	122	0	127

Subject Number	20	21	22	23	24	25	26	27		
Number of Observations Before QC	381	380	333	333	239	218	378	342		
Number of Observations After QC	75	0	87	0	79	0	53	0		

Table 1: Observation counts per-subject before and after Quality Control threshold filter restrictions

Subject Group Number	5	6	7	9	10	11	13	14
Number of Observations	58	86	32	31	21	107	107	100

Subject Group Number	15	17	19	20	22	24	26
Number of Observations	25	122	127	75	87	79	53

Table 2: Observation count per-subject, subjects with positive counts

Table 3 displays the descriptive statistics for the number of observations per-subject.

MIN	1st Q	Median	Mean	3rd Q	MAX
21	42.5	79	74.0	103.5	127

Table 3: observation count per-subject descriptive statistics

Figure 4: Predictor-Response pairing variable distributions

Figure 5: Predictor-Response variable pairings, post-transformation distributions

Model Designation	Model Description	Estimate	Std. Error	Test Statistic	p-value
LM	Linear Model	4.918e-2	1.455e-2	3.381*	7.47e-4
LM-FE	Linear Model with Fixed-Effect Intercept	4.833e-2	1.381e-2	3.500*	4.84e-4
LMM-RI	Linear Mixed Model with Random Intercept	4.920e-2	1.374e-2	3.579*	3.6e-4
LMM-RS	Linear Mixed Model with Random Slope	5.938e-2	3.538e-2	1.678*	1.19e-1
GEE	Generalized Estimating Equations	4.918e-2	1.455e-2	3.381**	7.47e-4

Table 4: Summary Table for $CD19 \sim MALAT1$ variable parings. * Approximate normal distribution. ** Approximate Wald-Z distribution

Model Designation	Model Description	Estimate	Std. Error	Test Statistic	p-value
LM	Linear Model	7.884e-1	4.92e-2	4.002*	<2e-16
LM-FE	Linear Model with Fixed-Effect Intercept	1.31e-1	3.42e-2	3.818*	1.42e-4
LMM-RI	Linear Mixed Model with Random Intercept	1.35e-1	3.42e-2	3.95*	8.4e-5
LMM-RS	Linear Mixed Model with Random Slope	1.705e-1	7.29e-2	2.34*	6.7e-2
GEE	Generalized Estimating Equations	7.884e-1	4.92e-2	4.002**	< 2e-16

Table 5: Summary Table for $CD34 \sim FBLN$ variable parings. * Approximate normal distribution. ** Approximate Wald-Z distribution

Model	LM	LM-FE	LMM-RI	LMM-RS	GEE
